

Service and Action/CAS Learning Outcomes

Increased awareness of strengths and areas for growth

Students are able to see themselves as individuals with various skills and abilities, some more developed than others, and understand that they can make choices about how they wish to move forward.

Undertaking new challenges

A new challenge may be an unfamiliar activity, or an extension to an existing one.

Planned and initiated activities

Planning and initiation will often be in collaboration with others. It can be shown in activities that are part of larger projects, for example, ongoing school activities in the local community, as well as in small student-led activities.

Working collaboratively with others

Collaboration can be shown in many different activities, such as team sports, playing music in a band, or helping in a kindergarten. At least one project, involving collaboration and the integration of at least two of creativity, action and service, is required.

Showing perseverance and commitment

At a minimum, this implies attending regularly and accepting a share of the responsibility for dealing with problems that arise in the course of activities.

Engaged with issues of global importance

Students may be involved in international projects but there are many global issues that can be acted upon locally or nationally (for example, environmental concerns, caring for the elderly).

Consideration of ethical implications

Ethical decisions arise in almost any activity engaging in the community (for example, public park improvement initiative, tutoring an elementary student, in relationships with others involved in service activities). Evidence of thinking about ethical issues can be shown in various ways, including journal entries and conversations with coordinators, teachers, and CAS advisers.

Developing new skills

As with new challenges, new skills may be shown in activities that the student has not previously undertaken, or in increased expertise in an established area.
